After a couple of years in which pigeon racing was just a new experience, Danilo Costa Resende dedicated himself to this sport in 1995. He became champion for the first time in 1998. Since then, he has won 15 times overall championship. He won 79 individual titles (although 5 of them, in Long Distance races with doublage), of which 7 at the district level and is currently the Overall National Champion. Its line of pigeons is based on a hen ring 2004, the "Champion", and the "Super 86". They were two super flyers and they became excellent breeders. Subsequently, he inserted some pigeons to strengthen his loft, mainly in the Long Distance Races. Of these pigeons, "Pedrez 28" stands out, a pigeon with Mattheeuws origin on the part of the father and Puterrie x Fabry on the part of the mother.
