

I started with the pigeons as soon as I was born in Salvaterra de Magos and stayed until 20 years old, then I stopped and came back in 1995 with 3 pigeons offered by Mr. Rui Magriço and it was a load of work, because in 1996 with + or- 100 young birds the first case of Adenovirus in Portugal, which left only 8 or 9 pigeons alive, was to give up, but the "bug" was already implanted and that's when I acquired some breeding pairs and started there again.

In good time I acquired my Fabris, which today are the base of my loft. In 2002 I decided that I was either serious or quit for good, it was then that I acquired only extra pigeons and started to create a Gold colony, as my results today prove.

Today they are part of my super loft, breeding specimens of the best pigeons in the world:
